Science Kits and Games

Purchase a few hands-on science kits. There are a lot of these kits available, but here are a few I suggest.

The Magic School Bus Series

The Young Scientists Club offers this series of fun and exciting science kits based on the popular Magic School Bus book series. They revealed two new themes in 2010. The themes include Magic School Bus Solar Energy to the Rescue and Magic School Bus Back in Time with the Dinosaurs. Go to www.kidsciencekits.com to learn more about these products and more offered by the Young Scientists club.
