The Magic School Bus®: Solar Energy to the Rescue

Heat up your winter with a science kit from the award-winning Young Scientists Club. Recreate global energy in a bottle and watch solar energy inflate balloons. And that is just for starters! Other fun experiments include collecting real carbon dioxide, using a solar panel to spin a fan, and making a solar secret code. Retail for \$19.99; for ages 5 and up. Visit www.kidsciencekits.com.
