## The Young Scientists Club Gets Practical Homeschooling Award

Jamestown, RI (May-2, 2018) – The Young Scientists Club has won the 2018 Reader Award for the Science Kits and Supplies category from Practical Homeschooling. The recognition was for the company’s Monthly Subscription kits, delivered right to your door! There are 36 themed kits, ranging from Phases of Matter, Circuits and Electromagnets to Stars and Surface Tension.

The organization said of the award, “Thousands of homeschoolers have cast their votes. A Practical Homeschooling Reader Award is the highest honor the homeschool community can bestow. The winners are the products that receive the highest ratings from satisfied users.”

The kits can be ordered at the company’s site—each kit is \$11.99 plus \$4.95 shipping & handling.

**ABOUT THE YOUNG SCIENTISTS CLUB** It’s been 19 years since Esther Novis, a mother of five and a former Harvard-trained biologist, started The Young Scientists Club as a summer science camp for her then 5-year-old son. Friends from other parts of the country told Novis they wanted to duplicate her concept and the idea for a science subscription service was born! The subscription kits are now mailed monthly to thousands of children around the world and the company’s retail kits are sold in hundreds of specialty stores. In addition to developing new products for The Young Scientists Club, this wise mom has many years of experience teaching at Phillips Academy, Andover and has written the science column for Parents Magazine plus wrote science experiments for the new science curriculum by McGraw-Hill Publishing.
